Blocktech  
2014

# A new era of technology is upon us.

Blockchains will become a foundational piece of commerce and communication.

**Blockchain** (bläk CHān) noun

A consensus based, decentralized, and open-source computer network built on public-key cryptography to store a secure record of events. See Also: *The Money of Things*

## Problem: Lack of Infrastructure

The great potential of blockchains has not yet been realized.

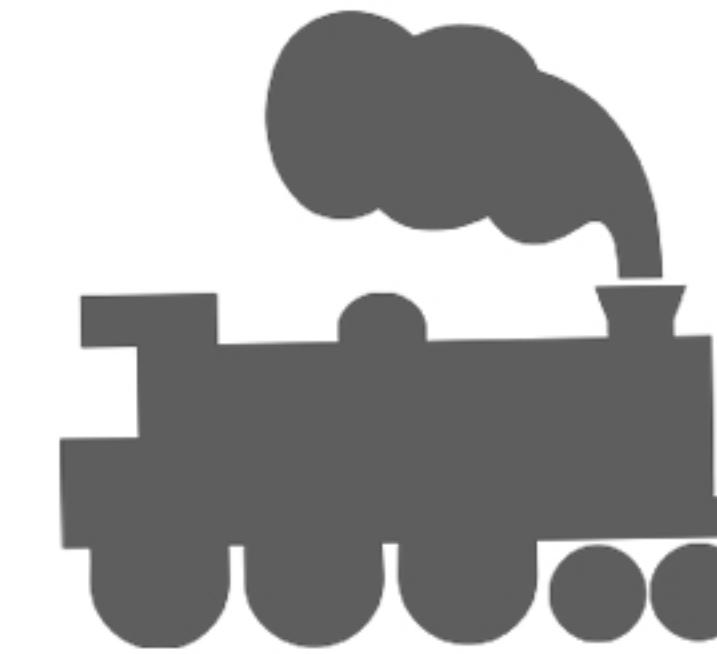

Blockchains can do more than financial remittance.

They can create new captive economies and solve issues of censorship, privacy, and digital IP.

# Blocktech is building “the banks and railroads” of the blockchain revolution

Exchange  
Asset Backed Networks  
Market Making  
Payment Tools  
Speculative Mining

Distributed Applications  
Open-source Hardware  
Consulting

Working with blockchains since 2011, we have the vision and technical knowledge to engineer the infrastructure.

# Railroads

Products and services to transport people and resources  
into the blockchain economy

## Consulting

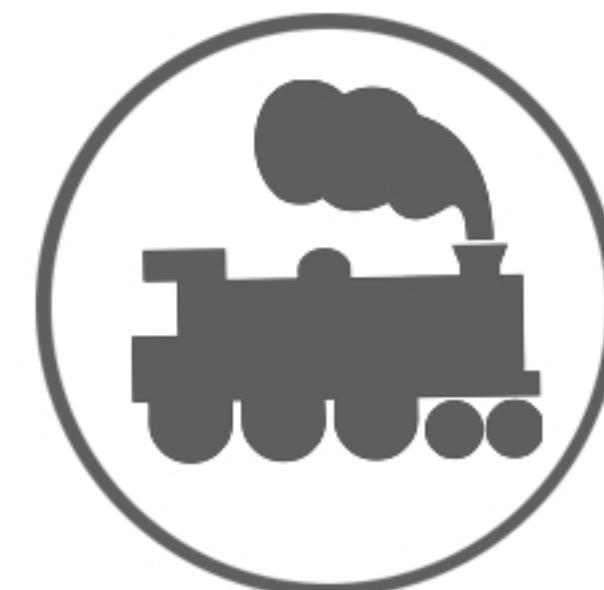

Services to grow the blockchain ecosystem  
and increase acceptance

BitSeeds: One coin mined = one tree planted  
*In partnership with nature.org*

## Distributed Apps

Scalable, self-regulating, peer-to-peer economies

Alexandria: Library of unalterable history records  
preserved in a blockchain

## Open-source hardware

Bridging the physical world with digital currency

ATM: open source, coin-agnostic, < \$500 to DIY

# Banks

**Investment grade products and services for financial professionals  
and commerce framework for businesses**

Blocktech Financial is *FINRA & FinCEN* registered

## **Altmarket.com**

A professional trading and  
exchange platform

## **Payment Tools**

Open source, multi-coin payment APIs  
for web services & distributed applications

## **Speculative Mining**

Market expertise to identify low competition  
blockchains with significant growth potential

## **Asset Backed Networks**

Tangible assets on a blockchain  
with guaranteed fungibility

## **Market Making**

Liquidity to support arbitrage  
and high-volume trading

**Blocktech's customers value**  
social justice, equality,  
**ecological responsibility,**  
**voluntaryism & open source**
